Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 July 2006.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Ise et al 6737243 in view of Walther et al 6660833. Ise et al teaches in the background section and in the body two separate methods of measuring the levels of SP-B or SP-C. However, Ise does not classify the levels as sufficient or deficient. Walther et al teaches that in patients with RDS, the surfactant levels (SP-B and SP=C are surfactants) are abnormal. Hence, it would have been obvious to modify Ise to characterize the surfactant levels, to diagnose RDS in a patient.

Claims 3-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ise et al and Walther et al, as applied to claim 2 above, and further in view of Rupprecht et al 6309705. The above combination does not automatically determine the dose. Rupprecht teaches a dosing calculating system for surfactant therapy. The physician calculates a dose and delivers a surfactant to the lungs through a tube from a reservoir. As such, it would have been obvious to modify the above combination to use such a method of therapy, as it is merely the substitution of one known therapy method for another. In addition, the examiner takes official notice that it would have been obvious to automate the dose calculating, to eliminate human errors from measurement.
